

ABSTRACT

5 A method and terminal for displaying information on a display, where the
information is provided with elements. An element is either having a continuous
length presenting a length which is equal to or greater than the size of said
display, or a wrapped length presenting a length which is less than the size of
said display. The display is further provided with a user interface having a
menu structure of items. The user interface is provided with a selectable
10 continuous length item and/or a wrapped length item. The information is
displayed according to the selection made in the menu structure of the user
interface, in order to allow the user to toggle between continuous length and
wrapped length.
